Professional Summary

Frontend developer in training transitioning from logistics operations with over a decade of experience in high-responsibility, compliance-driven environments. Currently completing the Frontend Simplified web development program and building applications using JavaScript, React, Next.js, HTML, CSS, and REST APIs. Seeking a junior frontend or frontend-adjacent role where strong problem solving, reliability, and modern web development skills can contribute to product teams.

Technical Skills

- JavaScript (ES6+), React, Next.js, HTML5, CSS3
- React Hooks (useState, useEffect), Component-Based Architecture
- Asynchronous JavaScript, Fetch API, REST API Integration
- Git, GitHub, npm, VS Code, Chrome DevTools
- SQL (basic queries), Linux (fundamentals), JSON

Technical Projects

- NFT Marketplace — React application with routing, API integration, reusable components, skeleton loading states, responsive design, and deployment via Vercel.
- D-BOM Movie Database Application — React movie search app using external API data, async/await fetching, dynamic UI rendering, and responsive layout.

Professional Experience

- FedEx Ground Contractor — CDL Class A Driver (2016–Present): Managed time-critical regional freight routes, coordinated with dispatch systems, maintained DOT compliance, and resolved operational issues including route changes and equipment troubleshooting.
- Owner Operator — Independent Contractor (~2 Years): Managed independent freight operations including route planning, scheduling, compliance, and maintenance coordination.
- OTR CDL Driver (~2 Years): Operated long-haul freight routes while maintaining safety, schedule adherence, and digital logging compliance.

Education & Training

- Frontend Simplified — Web Development Program (In Progress)
- Centriq Training — IT Administration Program
- Computer Animation Coursework — 2 semesters completed
